Digilent Design Contest Europe 2012

We proudly announce the 8th annual Digilent Design Contest Europe, organized within the Technical University of Cluj-Napoca, România and sponsored by Digilent!
The goal of this international student contest is to encourage students to develop their engineering hardware and software skills. We invite teams of students (one or two members) from all over Europe, to put in practice their ideas. Teams will have approximately 4 months to design and implement a project (FPGA or microcontroller) of their choice and present the final version in May 2012 in Cluj-Napoca, România.

Students will be provided state-of-the-art Digilent FPGA or microcontroller boards as well as peripheral modules to develop their projects. Please visit our website: http://www.digilent.ro to see all our products, especially the ones recommended for this year competition.

Visit us on the web for more information about the European Contest or write to:
contestEU@digilentinc.com

The most creative and complex solutions are rewarded with generous prizes!

Please forward this information to university students, especially from computer science or electrical engineering majors. Apart from the Digilent Contest Europe, there will be regional editions of the contest, to which you can apply. We encourage students to enroll in the regional contest that is convenient for them. More information about the event can be found at http://www.digilentinc.com/events/ddc2012/. Also see our previous events and the successful Munich Worldwide Finals.

Sincerely,
 The Digilent Team

* Pentru studentii clujeni, **lansarea oficiala** va avea loc marti, 22 Noiembrie 2011, ora 18:00 in sala P03, str. Baritiu, 26.
